GEOCHIMICA ET COSMOCHIMICA ACTA

EXECUTIVE EDITORS

PROF. C. W. CORRENS *Sedimentpetrographisches Institut der Universität, Lotzestr. 13, Göttingen, Germany*

PROF. E. INGERSON *Department of Geology, University of Texas, Austin 12, Texas, U.S.A.*

PROF. L. R. WAGER, F.R.S. *Department of Geology and Mineralogy, The University Museum, Oxford, England*

EDITORS

PROF. L. H. AHRENS *Department of Chemistry, University of Capetown, Rondebosch, Cape Province, South Africa*

DR. S. R. NOCKOLDS *Department of Mineralogy and Petrology, The University, Cambridge, England*

PROF. H. C. UREY, For. Mem. R. S. *University of California, La Jolla, California, U.S.A.*

DR. JOHN VERHOOGEN *Department of Geology, University of California, Berkeley, California, U.S.A.*

PROF. A. P. VINOGRADOV *Vernadsky Institute, Moscow, U.S.S.R.*

PROF. W. A. WAHL, *Observatoriegaten 8, Helsingfors, Finland*

INFORMATION FOR CONTRIBUTORS

I. GENERAL

1. Papers should be submitted to the appropriate Executive Editor—Prof. L. R. WAGER for papers from the United Kingdom and British Commonwealth, and for papers in English from Europe; Prof. C. W. CORRENS for papers in German or French; Prof. E. INGERSON for papers from the American continents. Papers submitted for publication will naturally be judged from the standpoint of scientific originality and novelty. Technical details of apparatus used in scientific investigation can, however, be presented in brief notes. Critical comments or preliminary results requiring early publication should be submitted as letters to the editors. Where possible, letters should be confined to 500 words. The preparation of progress reports and review articles will be invited by the editors from time to time. The journal appears as independent and complete numbers, which are combined into volumes of about 300 pages.

2. Only papers which have not been previously published can be accepted. Authors must agree not to publish elsewhere a paper submitted to and accepted by *Geochimica et Cosmochimica Acta*.

3. Fifty reprints of each paper are provided free. Additional copies can be purchased if ordered at the time the first proofs are returned. A reprint order form will accompany first proofs.

II. SCRIPT REQUIREMENTS

1. Scripts must be written in one of the three official languages—English, French or German.

2. The script should be typed (not a carbon copy). The text must be ready for printing and should be carefully checked for errors. Authors will receive proofs for correction.

3. Illustrations should accompany the script, mounted on separate sheets. Line diagrams that require to be redrawn should include all relevant details. Half-tone illustrations should be restricted to the minimum necessary. Photographs should be enlarged sufficiently to permit their clear reproduction, and if words or numbers appear on them, two copies should be sent, one clearly printed and the other without inscription. All illustrations should be provided with descriptive legends, which should be given on a separate sheet. Any lettering on diagrams—other than Greek letters, symbols, etc.—should be stencilled and should be sufficiently large and bold to permit reproduction when the diagram has been reduced to a size suitable for inclusion in the journal.

4. References in the text should be given by quoting the author's name and year of publication, i.e. AHRENS (1952). **Full references should be listed at the end of each paper, in alphabetical order, in the following manner:**

AHRENS, L. H. (1952) The use of ionization potentials—I. Ionic radii of the elements. *Geochim. et Cosmochim. Acta* **2**, 155–169.

and should include the full title of the article, standard abbreviated title of the journal, year, volume number and inclusive page numbers.

5. The text of articles submitted should be concise and in a readily understandable style. The technical description of the methods used should only be given in detail when such methods are new. The essential contents of each paper should be briefly recapitulated in an abstract in English. Such an abstract may, however, be submitted by the author in the language of the original typescript for translation into English by the editorial staff.

6. To conserve space, authors are requested to mark less important portions of the paper (such as description of methods, record of experimental results, etc.) for printing in smaller type.

7. Indices of refraction should be denoted by the symbols α , β , γ , ω , ε , n and vibration directions by X, Y, Z, O and E.

CONTENTS

NUMBER 1

Symposium on the chemical approaches to the recognition of Petroleum Source Rocks

WILLIAM E. HANSON: Foreword	1
E. E. BRAY and E. D. EVANS: Distribution of <i>n</i> -paraffins as a clue to recognition of source beds	2
J. GORDON ERDMAN: Some chemical aspects of petroleum genesis as related to the problem of source bed recognition	10
J. M. HUNT: Distribution of hydrocarbons in sedimentary rocks	37
Y. KHALIFEH et M. LOUIS: Étude de la matiere organique dans les roches sedimentaires	50
W. G. MEINSCHEN: Significance of hydrocarbons in sediments and petroleum	58

NUMBERS 2-4

FARRINGTON DANIELS: Kinetics and thermoluminescence in geochemistry	65
J. H. FETH, S. M. ROGERS and C. E. ROBERSON: Aqua de Ney, California, a spring of unique chemical character	75
IAN CARMICHAEL and ALISON McDONALD: The colorimetric and polarographic determination of some trace elements in the standard rocks G-1 and W-1	87
L. O. NICOLAYSEN, A. J. BURGER, T. TATSUMI and L. H. AHRENS: Age measurements on pegmatites and a basic charnockite lens occurring near Lützow-Holm Bay, Antarctica	94
R. PARK and H. N. DUNNING: Stable carbon isotope studies of crude oils and their porphyrin aggregates	99
R. NEWTON and G. F. ROUND: The diffusion of helium through sedimentary rocks	106
M. HONDA, J. P. SHEDLOVSKY and J. R. ARNOLD: Radioactive species produced by cosmic rays in iron meteorites	133
S. R. TAYLOR, MAUREEN SACHS and R. D. CHERRY: Studies of tektite composition—I. Inverse relationship between SiO ₂ and the other major constituents	155
R. D. CHERRY and S. R. TAYLOR: Studies of tektite composition—II. Derivation from a quartz-shale mixture	164
D. V. N. SARMA and T. MAYEDA: Meteorite analysis: the search for diamond	169
L. R. STIEFF and T. W. STERN: Graphic and algebraic solutions of the discordant lead-uranium age problem	176

J. N. WEBER and G. V. MIDDLETON: Geochemistry of the turbidites of the Normanskill and Charny formations—I. Effect of turbidity currents on the chemical differentiation of turbidites	200
II. Distribution of trace elements	244
Geochemical Note:	
A. C. COOK: The carbon isotopic compositions of certain marine invertebrates and coals from the Australian Permian	289
Book Reviews	291
